

USIDNET DNA and Cell Repository
Statement of Research Intent

Before human cell cultures or DNA samples can be shipped from the USIDNET DNA and Cell Repository, the investigator who wishes to obtain cell lines or DNA samples from the Repository must provide the Repository with a description of the purpose of the research to be done using the cell cultures or DNA samples, the *Statement of Research Intent*.

1. List the Repository number for each cell culture or DNA sample you wish to order. Repository Number Description

_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

2. These samples will be used in the following ways (check all that apply).

- ☐ Perform functional studies
- ☐ Serve as positive or negative controls for genetic testing
- ☐ Serve as positive or negative controls for assay development
- ☐ SNP discovery/genotyping/haplotyping
- ☐ Sequence portions of the genome
- ☐ Identify novel genes
- ☐ Characterize genes and mutations
- ☐ Study gene expression
- ☐ Determine the ancestral state of a polymorphism/haplotype
- ☐ Conduct proteomic studies
- ☐ Other (specify) _____

3. Please describe more specifically the study or studies you will be conducting using these samples. (You may type and attach the description if you wish)
